

DRINKWATER

AquaGel®

**Shear-thinning gel that suspends, transports,
and clears solids**

AQUAGEL® APPLICATIONS:

Debris Removal

Clean Sweeps **Start Here**

AquaGel® is a water-soluble, viscoelastic gel used to support pigging runs in pipelines that require efficient debris removal. It's ideal for cleaning and flushing operations that benefit from a non-mechanical, easy-to-deploy solution. AquaGel® is also a safer, more environmentally friendly alternative to hydrocarbon-based systems and can be used independently or alongside mechanical pigs.

HOW IT WORKS

- Supports internal geometry mapping in surveillance runs
- Prevents fluid mixing with efficient spacing and solids removal
- Eliminates the need for traditional pigging hardware
- Enables efficient solids suspension, transport, and removal

AVAILABLE PACKAGING:

- **50-gallon** (19-liter) pails
- **55-gallon** (208-liter) drums
- **Tote tanks for ready-to-pump applications**

WHERE IT WORKS

- Mapping or diagnostic runs that need gel support
- Lines with incompatible fluid transitions
- Systems without launcher/receiver setups
- Jobs needing safer, environmentally-friendly solutions

**See our full line
of chemicals**

Drinkwater offers a complete line of chemical solutions that work in conjunction with your pigs to boost efficiency, remove debris, prevent corrosion, and extend the life of your pipeline. Our tailored solutions help make every pigging run cleaner, smoother, and more effective.
