

Complete Pipeline Care

Chemical Solutions That Work In Conjunction with Your Pigs

A scientific approach to pipeline maintenance and corrosion control

Drinkwater offers a comprehensive line of chemical and gel solutions designed to work alongside our pigs to improve pipeline performance by removing debris, mitigating corrosion, and extending the life of your pipeline.

From wax and asphaltene control to sand and black powder removal, we offer oil and water-based gels and solvents that enhance pigging operations and corrosion treatments, making your pig runs more efficient and effective.

- Wax Removal
- Corrosion Control
- Iron Sulfide and Sand Removal
- Asphaltene Removal
- Dew Point Control
- Hydrate Mitigation

Chemical Products We Offer:

PetroGel®

Oil-Based

Pyrogel

Black Powder Treatment

NoPhalt®

Asphaltene Dissolver

AquaGel®

Water-Based

Saf-C-H₂O® PL

Seawater Treatment System

CHEMICAL PRODUCTS OVERVIEW:

PetroGel®

Oil-Based

- Suspends solids to prevent “bulldozer” effect
- Lubricates pigs & ILI tools
- Penetrates tight restrictions and reforms after

Pyrogel

Black Powder Treatment

- Suspends pyrophoric black powder during flow
- Supports safer black powder handling & disposal
- Breaks down easily for cleanup
- Pairs with pigging for complete removal

NoPhalt®

Asphaltene Dissolver

- Breaks down and stabilizes asphaltenes
- Delivers deep penetration in plugged systems
- Resists asphaltene clusters from reforming
- Customizable as a solvent, gel, or hybrid

AquaGel®

Water-Based

- Suspends & transports solids efficiently
- Prevents fluid mixing during cleaning
- Ideal for launch-free systems

Saf-C-H₂O® PL

Seawater Treatment System

- Inhibits corrosion caused by seawater use
- Prevents fouling from solids and biofilm
- Flexible for short- or long-term use
- Protects pipelines during storage, suspension, or flushing
