

DRINKWATER

Pig Washer

A **Heavy-Duty Machine** Built To Clean Your Heavy-Duty Pigs

The regular cleaning of your pipeline pigs extends the life of your pig by removing harmful pipeline debris from the pig itself.

The Drinkwater Pig Washer provides safe, effective cleaning to save you time and the headache of dealing with the mess.

With 13 standard models to choose from, custom units with turntables up to 72 inches, weight capacities up to 50,000 pounds, recirculating and fresh water rinse cycles, ambient and heated blow-off options available, we have the cleaning system to not only meet, but exceed your cleaning requirements.

FEATURES

Gear and Sprocket-Driven

Turntable for consistent rotation, resulting in optimal cleaning

Designed to carry heavy loads in any industry and **can handle weights from 1,000+50,000 lbs**

Mid-Level, Swing Away Spray Bars to **clean a wide range of part sizes**

V-Notch Door for easy loading and unloading

Industrial controls and stainless steel v-jet nozzles for ease of operation and upkeep

Pipeline Integrity Solutions

DrinkwaterProducts.com
