

DRINKWATER

Pikotek® / GPT

Pikotek® Isolation Kits have a proven track record as the most reliable insulating kits in the industry, especially in tough sealing environments.

The EVO is the next-gen in Isolation Kit technology. Offering FireSafe capabilities with an impervious proprietary coating, the EVO will revolutionize the way you think about flange isolation.

These gaskets are easy to install and deliver reliable sealing.

Drinkwater is proud to be the largest US distributor of Pikotek® gaskets.

FEATURED PRODUCTS

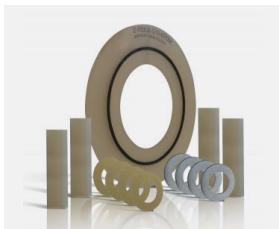

■ EVOLUTION® Isolation Kits

- Feature a proprietary coating designed for high abrasion, impact, and chemical resistance, offering superior protection against common chemicals found in pipelines
- EVOLUTION® has passed API 6FB fire testing in multiple sizes and pressure classes and has a considerable increase in operating temperature over GRE products.
- EVOLUTION® does not have the permeation issues or chemical attack that plagues GRE gaskets.

■ Pikotek® VCS® Isolating Gaskets

- Extremely high reliability sealing and insulating properties suitable for all critical services, allowing it to withstand corrosive environments
- VCS® Gaskets have a pressure-activated seal that eliminate costly leaks, are easy to install, and can match any flange specification

■ Pikotek® Gaskets - LineBacker®

- Utilizes a rectangular sealing element with a unique groove design to effectively seal and isolate flanges of all types
- Variety of materials can be used providing excellent temperature and chemical range compatibility
