

DRINKWATER

NoPhalt®

**Breaks down and clears asphaltene buildup
for longer-lasting production**

NOPHALT® APPLICATIONS:

Cleaning

Rescue

Clear the Cluster. **Keep Flowing.**

NoPhalt® is a powerful solution designed to break up and remove tough asphaltene buildup in pipelines. Unlike traditional solvents, it's built to stay in place longer, reach more of the zone, and keep those broken-up particles from clumping back together. That means smoother flowback, fewer blockages, and longer-lasting results. Whether you need a basic solvent or a more advanced gel-based system, NoPhalt® can be customized to fit your job and keep production flowing.

HOW IT WORKS

- Breaks down and stabilizes asphaltenes
- Reaches deep into damaged zones
- Flexible delivery: solvent, gelled, or blended format
- Requires less volume than xylene with longer-lasting results

WHERE IT WORKS

- Oil pipelines with asphaltene buildup or blockages
- Wells needing zonal coverage or diversion
- Jobs requiring deeper penetration than basic solvents
- Projects needing safer, more efficient treatment options

AVAILABLE PACKAGING:

- **55-gallon**
(208-liter) drums
- **Transportable tote tanks for
ready-to-pump applications**
