

DRINKWATER

PetroGel®

Hydrocarbon-based gel that lubricates pigs and transports debris.

Designed to **Dislodge.**
Built for **Smoother Runs.**

PetroGel® is a powerful oil-based pigging gel engineered to clean pipelines by breaking down and carrying away wax, paraffin, and black powder. Its viscoelastic formula keeps debris suspended, protects mechanical pigs, and ensures consistent flow during cleaning runs.

HOW IT WORKS

- Viscous properties flow through restrictions and fully reform after
- Suspends and transports solids in concentric flow to prevent bulldozing
- Prevents mechanical pig or ILI tool sticking
- Can be pumped ready-to-use or blended with hydrocarbon on-site

WHERE IT WORKS

- Crude oil pipelines with built-up wax and paraffin
- Natural gas pipelines with black powder accumulation
- Cleaning runs where pigs or ILI tools risk getting stuck
- Systems requiring a lubricating pill to assist pig movement
- Applications needing a temporary gel pig for mapping or flow assurance

PETROGEL® APPLICATIONS:

Unpiggable Lines

Debris Removal

Deoiling

Rescue

AVAILABLE PACKAGING:

- **5-gallon**
(19-liter) pails
- **55-gallon**
(208-liter) drums
- **Tote tanks for ready-to-pump applications**
